

CLEANING & DISINFECTING

Cleaning

Important to clean before you disinfect. "Cleaning removes visible dirt, dust, spills, smears, grime, organic material such as blood, and some germs from surfaces."

Disinfecting

The process of killing germs.

Important to use an EPA registered product cleaner.

High-touch surfaces

- Bed rails
- Call lights
- Keyboards
- Light switches
- Doorknobs
- Phones
- Pens
- Sink faucets
- Grab bars

Read the Label

- Is the product EPA-approved?
- On which surfaces can the disinfectant be used?
- What germs has the disinfectant been proven to kill?
- Should the product be diluted?
- What is the contact/dwell/wet time?

Cleaning & Disinfection Tips

- Do not rush contact time for disinfection.
- Do follow the listed contact time.
- Do not wipe the solution.
- Do not blow the solution.
