20. Name of Attending Physician (Type/Print)	21. Name of Person Completing Report (Type/Print)
--	---

Signature of Attending Physician	Date
----------------------------------	------

Important instructions for completion of report

Section 14-02.1-07 of the North Dakota Century Code provides that an abortion report be completed for each abortion which occurs in this state (effective July 1, 1979).

The item "patient identification" is not to be utilized for personally identifying information such as name, etc., but is provided for your convenience in assigning and identifier linking this report with your own medical records.

All reports would be prepared on a typewriter with a black ribbon or printed legibly with black non-fading ink and all signatures should be entered in black non-fading ink.

Adverse Events:

Death Check only if you suspect that the death was an outcome of the adverse event.

Life Threatening The patient was at substantial risk of dying at the time of the adverse event or the use or continued use of the device or other medical product might have resulted in the death of the patient.

Hospitalization Check if admission to the hospital or prolongation was a result of the adverse event.

Disability Check if the adverse event resulted in a substantial disruption of a person's ability to conduct normal life functions. Such would be the case if the adverse event resulted in a significant, persistent, or permanent change, impairment, damage or disruption in the patient's body function/structure, physical activities and/or quality of life.

Congenital Anomaly Check if you suspect that exposure to a medical product prior to conception or during pregnancy may have resulted in an adverse outcome in the child.

Required Intervention Check if you believe that medical or surgical intervention was necessary to preclude permanent impairment of a body structure, either situation suspected to be due to the use of a medical product.

Other Check when the event does not fit the other outcomes, but the event may jeopardize the patient and may require medical or surgical intervention to prevent one of the other outcomes. Examples include allergic broch spasm (a serious problem with breathing) requiring treatment in an emergency room, serious blood dyscrasias (blood disorders) or seizures/convulsions that do not result in hospitalization.

Any questions concerning the proper completion of this report may be directed to the Vital Records Unit (Telephone Number 328-2360) or directed to the address at the bottom.
