**CHECKLIST OF REQUIRED EQUIPMENT: ALS GROUND AMBULANCE**

<p><i>Make copies if additional pages are needed.</i></p> <p><b>Item</b>                      <b>Place an "X" in boxes if stocked.</b></p>	Unit Number(s)			
	UNIT #	UNIT #	UNIT #	UNIT #
Mounted ambulance cot with retaining straps				
Stretchers with retaining straps. Vehicle design dictates quantity.				
One adult long backboard, with retaining straps				
One seated spinal immobilization device, with retaining straps				
One pediatric-safe transport device				
One adult cervical collar				
One pediatric cervical collar				
Piped oxygen system - with appropriate regulator and flow meter, or two "E" size bottles for minimum oxygen supply with regulator and flow meter				
Portable oxygen unit with carrying device, including one "D" size bottle with another "D" bottle in reserve				
Three adult cannulas				
Three pediatric nasal cannulas				
Three adult nonrebreather oxygen masks				
Three pediatric nonrebreather oxygen masks				
Three sets of oxygen supply tubing				
Noninvasive positive pressure ventilation device				
Nebulizer with tubing				
End-tidal carbon dioxide detectors with pediatric and adult capability				
Wall-mounted suction capable of achieving a minimum of four hundred millimeters of mercury vacuum within four seconds or less after clamping the suction tube				
Portable suction capable of achieving a minimum of four hundred millimeters of mercury vacuum within four seconds or less after clamping the suction tube				
One rigid tonsil tip suction catheter				
One flexible suction catheter between size six and ten french				
One flexible suction catheter between twelve and sixteen french				
One meconium aspirator adaptor				
One set of adult sizes nasopharyngeal airways				
One set of pediatric sizes nasopharyngeal airways				
One set of adult sizes oropharyngeal airways				
One set of child sizes oropharyngeal airways				
One set of infant sizes oropharyngeal airways				
Alternative airway devices such as supraglottic airway as approved by local medical direction				
Adult endotracheal airway equipment

		UNIT #	UNIT #	UNIT #	UNIT #
<b>Item</b>					
Pediatric endotracheal airway equipment					
One size zero straight laryngoscope blade					
One size one straight laryngoscope blade					
One size two straight laryngoscope blade					
One size three or four straight laryngoscope blade					
One size two curved laryngoscope blade					
One size three or four curved laryngoscope blade					
One adult stylette					
One pediatric stylette					
One pair of adult Magill forceps					
One pair of pediatric Magill forceps					
One adult laryngoscope handle with extra batteries					
One pediatric laryngoscope handle with extra batteries					
One adult bag valve mask resuscitation unit with face mask					
One child bag valve mask resuscitation unit with face mask					
One infant bag valve mask resuscitation unit with face mask					
Adult commercial fracture splints usable for open and closed fractures, or padded boards					
Pediatric commercial fracture splints usable for open and closed fractures, or padded boards					
Adult lower extremity traction splint					
Pediatric lower extremity traction splint					
Hot packs - four minimum					
Cold packs - four minimum					
Two sterile burn sheets or equivalent					
Three triangular bandages or commercial slings					
Two trauma dressings – approximately ten inches (25.4 centimeters) by thirty-six inches (91.44 centimeters)					
Twenty-five sterile gauze pads – approximately four inches (10.16 centimeters) by four inches (10.16 centimeters)					
Twelve soft roller self-adhering type bandages – approximately five yards (4.57 meters) long					
Two sterile occlusive dressings – approximately three inches (76.2 millimeters) by nine inches (228.6 millimeters)					
Two commercial “tactical” tourniquets					
Adult blood pressure cuff					
Large adult blood pressure cuff					
Child blood pressure cuff					
Stethoscope					
Pulse oximeter

		UNIT #	UNIT #	UNIT #	UNIT #
Glucose measuring device					
Penlight					
Thermometer					
Manual cardiac monitor defibrillator with transcutaneous pacing, waveform capnography, and pediatric capabilities					
Monitor electrocardiogram paper rolls					
Monitor electrodes					
Adult defibrillator pads					
Pediatric defibrillator pads					
Three oral doses of glucose or glucose					
One small bottle, chewable aspirin					
Epinephrine, auto-injector for adult and pediatric doses or intramuscular, including syringes and needles for intramuscular delivery, if approved by medical director					
Naloxone, auto-injector (0.8 mg) or intranasal (4 mg – nasal spray, or syringe and atomizer)					
Intravenous therapy equipment, including venous restriction device, micro and macro drip administration sets, catheters from sixteen gauge to twenty-four gauge, intraosseous needles, tubing, solutions, and intravenous arm boards for both pediatric and adult patients, as approved by local medical direction					
Syringes and needles					
One size small box of nitrile gloves					
One size medium box of nitrile gloves					
One size large box of nitrile gloves					
Box of surgical masks					
N95 masks, in small, medium, and large sizes and at least one per crew member					
Four nonabsorbent gowns					
Four pairs of protective eyewear					
Three red biohazard bags					
Biological fluid cleanup kit					
One sharps container, that is less than half full					
Medical grade disinfectant					
One gallon (3.79 liters) of distilled water or saline solution					
One bedpan					
One emesis basin					
One urinal					
One container of nonwater hand disinfectant					
Two reflective vests					
A minimum set of three reflectorized flares					
Two flashlights

		UNIT #	UNIT #	UNIT #	UNIT #
<b>Item</b>					
A minimum of two dry chemical, mounted, five-pound (2.27 kilogram) fire extinguishers located in patient compartment and in either cab or exterior compartment					
Helmet, protective safety glasses or goggles eyewear, and leather or extrication gloves per crew member					
Two window and glass punches located in patient compartment and in cab					
Radio, compatible with local communications system					
Portable, hand-held radio, rechargeable, battery-operated, compatible with local communication system					
Automated external defibrillator					
Twenty-five triage tags					
Pediatric reference material for equipment sizing and medication dosing					
Four assorted sizes rolls of tape					
Two blunt shears					
Cot-mounted or ceiling hooks intravenous fluid holder					
Two blankets					
Four sheets					
Four towels					
Disposable or sterilizable obstetrical kit that includes an infant bulb suction and receiving blanket with head cover					
One current edition of the Emergency Response Guidebook					
Alcohol or iodine swabs					
Water-soluble lubricant					
Razor					
Following minimum medication requirements must be carried in pediatric and adult dosages:					
1. Alkalinizer agent					
2. Bronchodilator – adrenergic intravenous or subcutaneous					
3. Bronchodilator for nebulized delivery					
4. Antidysrhythmic or antiarrhythmic					
5. Anticholinergen parasympatholytic					
6. Opioid antagonist					
7. Coronary vasodilator, antianginal					
8. Anxiolytic					
9. Dextrose containing solution					
10. Anticonvulsant					
11. Analgesic					
12. Antiemetic
