North Dakota Immunization Information System

## **School Immunization Forecaster**

## **Getting Started**

1.) Find the individual student record by clicking on the **Patient** option of the NDIIS **Main Menu** and then clicking **Management** from the drop-down. This will open the **Patient Search Criteria**.

IDIIS	North Dakota Immunization Information Syste			Th sea is	e easiest way to arch for a student s by using their

*	Provider	>	First Name	Date of Birth	
	Reports	Show Fuzzy Matches			
2	Help				

2.) Search for your student using a combination of first name, last name, and date of birth. Click **Search** to generate the list of potential matches.

The NDIIS will return up to 100 possible matches based on the search criteria entered.

3.) To open the student record, click on the name from the search results to highlight it then click **View Detail**.

## **Immunization Forecast**

The immunization forecast will open as a PDF with all school required immunizations highlighted. The forecaster includes:

- ⇒ Student name, birthdate, and age (in days, weeks, and years.)
- ⇒ Vaccination Summary lists all valid immunizations that the student has received; invalid doses will not be listed in the vaccination summary section
- ⇒ Vaccine Forecast lists all the immunizations the student is past due and or coming due for, and includes:

Vaccine type

Dose number in series

Recommended date of administration (based on the routine, age-based immunization schedule as set by the Advisory Committee on Immunization Practices (ACIP))

Minimum valid date (earliest date the immunization can be given and still be counted as a valid dose)

⇒ **Comments** relating to invalid doses and immunization exemptions

Note: If there are exemptions in a student's record, the forecaster will no longer recommend any doses of that vaccine.
