CQL ACCREDITATION

THE CQL DIFFERENCE

Organization-wide accreditation is more meaningful.

- CQL's approach to accreditation leads to best practices being embraced at all levels, for all services across an entire agency.

Data capabilities are integrated into accreditation.

- Accreditation alone can have value, but the inability to assess and analyze it, is limiting in determining success.

Partnership involves access to other offerings.

- Aside from just data, agencies often take advantage of CQL training, certification, and ongoing consultation.

Appreciative Inquiry helps replicate success.

- The concept identifies pockets of excellence and lays out how those successes can be utilized in areas of improvement.
