

ADULT FAMILY SURVEY 2022-23

DATA AT A GLANCE FOR NORTH DAKOTA

SAMPLE SIZE

130 total respondents

GENDER AND AGE OF FAMILY MEMBER

INTRODUCTION

What is National Core Indicators - Intellectual and Developmental Disabilities (NCI-IDD™) Adult Family Survey (AFS)?

The survey data in this summary represent families with an adult family member (18 years of age or older) who lives in the family home AND receives one service (not including case management) from the developmental disability services in North Dakota. NCI-IDD is a collaboration of participating states, NASDDDS, and HSRI. NCI is a voluntary effort by states to measure and track performance of developmental disability services.

While reviewing this resource it is important to note the following:

- **"Family member"** refers to children or adults with intellectual or developmental disabilities who use long-term services and supports.
- **"Respondent"** refers to family members or guardians of the person using services.
- Data displayed in this resource are weighted and reflect a selection of key outcomes.
