

Measles Checklist

For schools and child cares

Before a Case Occurs

- Know measles signs and symptoms.
- Make sure students have record of MMR vaccine or legal exemption on file.
- Recommend staff make sure they have received MMR vaccine or are considered immune to measles.
- Let families and staff know that if they have not received MMR vaccine they may need to isolate at home for 21 days each time exposure to measles occurs.

If a Student/Staff Member Gets Measles

- Report suspected measles case(s) to North Dakota Health and Human Services. **Call (701) 328-3386.**
- Prepare to give HHS contact and vaccine information for students and staff members in attendance while the person(s) had measles and were in attendance.
- Prepare to give HHS contact information for visitors, volunteers, etc., who were at the school/child care while the person(s) had measles and were in attendance.
- Follow HHS guidelines for exposed students and staff according to immunization/immunity status.
